

# REASON FOR VALUATION

## OTHER REASONS FOR VALUATION

*Whatever your reason for needing a business valuation, we have the expertise to help.*

### Valuation needs come in many shapes

Not every valuation fits neatly into a standard category. Businesses are complex, circumstances are varied, and the reasons for needing an independent valuation are more diverse than most people realise. If you have a valuation need that does not fit one of our standard use cases, we want to hear from you.

### Common situations we support

- Insurance underwriting – establishing the insurable value of a business or its key assets
- Lender and credit assessments – supporting loan applications, covenant reviews, and security valuations
- Regulatory submissions – valuations required by financial sector regulators or licensing bodies
- Intellectual property and intangible asset valuations – brands, patents, customer relationships, and technology
- Joint venture structuring and partner buy-ins – establishing a fair value baseline for new partnerships
- Fundraising and investor presentations – providing an independent basis for investor negotiations
- ESOP and profit-sharing scheme design – supporting the fair allocation of equity or profit interests
- Impairment testing and purchase price allocation – for financial reporting under IFRS and GAAP

*A valuation is a professional opinion of value at a specific point in time, based on the information available and the assumptions applied. Our focus is not just calculation – but defensibility, transparency, and clarity so you can rely on the output with confidence.*

### Not sure if you need a valuation?

If you are facing a decision – financial, legal, strategic, or personal – where the value of a business is a relevant input, you almost certainly benefit from an independent opinion. The cost of getting it wrong is almost always greater than the cost of getting it right.

Contact our team for a no-obligation discovery conversation. We will tell you honestly whether a valuation will add value to your situation – and if so, what the right approach looks like.

### Global coverage across all sectors

We serve clients across all industries and in multiple jurisdictions. Our team brings experience in technology, financial services, professional services, industrials, healthcare, consumer, and many other sectors. Whatever your business does, wherever it operates, we can help you understand what it is worth.
